Abstract

© 2015, Asian Social Science. All rights reserved. The study looks at the activities of the Regional Office of Social Insurance Fund of the Russian Federation (SIF RF) in the Republic of Tatarstan (RT) regarding national insurance coverage. The study uses instruments for correlation – regression analysis to identify the factors to increase social security payments. The authors explain the projected change in insurance fees against short-term disability and maternity; formulate recommendations for regional offices of the SIF RF aimed to reduce past due debts; identify the role of the RF Social Insurance Fund in providing sustainable macroeconomic development.
